Education

Tribhuvan University, IOE, Pulchowk Campus

Nov 2019 – May 2024

Bachelor of Mechanical Engineering

Lalitpur, Nepal

- **Elective I:** Heating, Ventilation, and Air Conditioning
- **Elective II:** Refrigeration
- **Elective III:** Building Services

Xavier International College, NEB

2017 – 2019

+2 Science, Physical (CGPA: 3.39 / 4.00)

Kathmandu, Nepal

Experience

GreenTech Nepal Pvt.Ltd

Oct 2023 – Dec 2023

Research and Development Engineer Intern

Lalitpur, Nepal

- Conducted a literature review on heat pump dryer systems for agricultural products and designed a custom system for drying oyster mushrooms, considering optimal temperature, humidity, and product attributes.
- Selected components like heat exchangers, compressors, and evaporators based on performance, cost, and compatibility to create an efficient heat pump dryer tailored to the mushroom drying process.

Projects

Design and fabrication of manufacturing machine for Bamboo panel production process. | Mechanical Design, Fabrication Technique Jun 2023 – Apr 2024

- Developed and constructed a specialized manufacturing machine for bamboo panel production, featuring automated adhesive application, mat formation, and hydraulic pressing with integrated heating elements.
- Conducted thorough strength testing to assess the structural integrity, durability, and versatility of the bamboo panels for diverse applications.

Go-Kart (FireBall2.0) | Mechanical Design, Structural Analysis, Fabrication Techniques

Jan 2024 – Feb 2024

- Design, analysis and fabrication of a chassis to house a potent 150cc four-stroke bike engine, achieving top speeds of up to 85 km/hr.
 - Incorporated adjustable camber angle and chain adjustment features for precise handling customization enhancing overall performance on the racetrack.
- Visit

Electric Bike | Metal Fabrication, Electric Motor, Wiring Harness

Apr 2017 – Jun 2017

- Fabricated a robust chassis to ensure durability and safety, employing hands-on fabrication techniques.
 - Integrated a 48V 500W brushless hub motor and compatible controller, achieving smooth propulsion and enabling a top speed of 40 km/hr with a mileage of 40-60 km/hr.
- Visit

Three Wheeler Hybrid Car | Hybrid Electric Vehicle, Solar Energy, Internal Combustion Engines

Oct 2018 – Feb 2019

- Developed a versatile three-wheeler hybrid car capable of operating in both petrol and electric modes.
 - Integrated a 125cc 4-stroke bike engine alongside a 750W BLDC motor, allowing users to choose between traditional combustion power and eco-friendly electric propulsion based on preference and driving conditions.
- Visit

SuffoSafe: Automatic Bathroom Smoke Evacuation System | Arduino

Mar 2022 – Mar 2022

- Led the fabrication of SuffoSafe, a safety solution prompted by a suffocation incident, swiftly removing excess smoke to ensure people's safety.
- It aims to enhance bathroom safety by preventing suffocation accidents caused by poor ventilation, detecting and mitigating smoke buildup effectively.

Go-Kart (FireBall) | Metal Fabrication, IC Engine

Oct 2022 – Jan 2023

- Constructed a high-performance go-kart tailored for racing purposes, equipped with a potent 180cc four-stroke bike engine.
- Achieved impressive speeds of up to 75 km/hr, showcasing superior acceleration and handling characteristics on the racetrack.

Go-Kart | Metal Fabrication, IC Engine

Nov 2019 – Jan 2020

- Constructed a go-kart for racing purposes, equipped with a 125cc four-stroke bike engine.
- Achieved speeds of up to 40 km/hr.

Design of Coldstore | Cooling Load Calculation, Refrigeration Equipment Selection

Feb 2024 – Mar 2024

- Designed a seed potato cold store with a focus on maintaining optimal storage conditions through calculations of cooling loads, accounting for insulation, ambient temperature, desired storage temperature and humidity.
- The refrigerated equipment was chosen based on the estimated cooling load and storage requirements, with an emphasis on energy efficiency and efficient temperature control to preserve seed potatoes.

Design of Firefighting System | System Design, Hydraulic Calculations, Technical Analysis

Feb 2024 – Mar 2024

- Designed a comprehensive firefighting system for the building, incorporating both fire sprinklers and fire hydrant standpipes strategically positioned for maximum coverage and efficiency in suppressing fires.
- Conducted hydraulic calculations to optimize water distribution and pressure within the fire sprinkler and hydrant standpipe systems

Design of Air Conditioner in Building | Heating Load Calculation

Aug 2018 – Sep 2018

- Conducted comprehensive calculations to assess the heating load of the building, considering factors such as insulation, ambient temperature, and desired room temperature.
- Plan layout of split AC system in multistory building.

Honors and awards

Go-Kart Winner (MechTRIX 2080) | SOMAES, IOE Pulchowk

Feb 2024

- Led the winning team "FireBall 2.0" in the go-kart race organized by SOMAES during MechTRIX 2080.
- FireBall 2.0 with 150cc four-stroke bike engine, achieving an impressive top speed of 85 km/hr and demonstrating superior performance on the racetrack.

Go-Kart Winner (MechTRIX 2079) | SOMAES, IOE Pulchowk

Jan 2023

- Led the winning team "FireBall" in the go-kart race organized by SOMAES during MechTRIX 2079.
- FireBall with 180cc four-stroke bike engine, achieving an impressive top speed of 75 km/hr and demonstrating superior performance on the racetrack.

+2 B.E. Design Winner (MechTRIX X) | SOMAES, IOE Pulchowk

Jan 2019

- Presented a Three Wheeler Hybrid Car project with integrated Arduino and sensor technology, showcasing advanced functionalities.
- Implemented comprehensive safety and security features including GPS tracking, alcohol detection, obstacle detection, and alert systems to enhance driver safety and reduce collision risks.

+2 B.E. Design Winner (MechTRIX 8.0) | SOMAES, IOE Pulchowk

Feb 2018

- Presented an electric bike project featuring advanced functionalities integrated using Arduino and sensor technology.
- Upgraded the electric bike with a smart helmet, GPS tracker, and alcohol detector for enhanced safety and usability.

Training and Certifications

Hardware Fellowship Workshop | LOCUS

Dec 2019

- A 10 Day Arduino workshop and crash course in electronic hardware design.

International Astronomical Search Collaboration | Pan-STARRS

Sep 2018

- Participated in the International Astronomical Search Collaboration, a prestigious program focused on the observation and analysis of near-Earth objects (NEOs) and main belt asteroids.

Technical Skills

Languages: English, Nepali

Software: SolidWorks, AutoCAD, ANSYS

Workshop Tools: Lathe, Welding, Grinder, Driller
